## Introduction

Transition services incorporate a broad array of services and activities that prepare youth with disabilities for life after school. The Individuals with Disabilities Education Act (IDEA) defines **transition services** as a coordinated set of activities for a child with a disability that:

- Is designed within a results-oriented process, that is focused on improving the academic and functional achievement of the child with a disability to facilitate the child's movement from school to **post-school activities**, including **postsecondary education**, vocational education, **integrated employment** (including supported employment); continuing and adult education, adult services, independent living, or community participation;
- Is based on the individual child's needs, taking into account the child's strengths, preferences, and interests'; and
- Includes instruction, related services, community experiences, the development of employment and other post-school adult living objectives, and if appropriate, acquisition of daily living objectives and functional vocational evaluations.

[34 CFR 300.43 (a)] [20 U.S.C. 1401 (34)] (U.S. Department of Education, 2007)

Requirements for transition services must be documented in the IEP and must include "appropriate measurable postsecondary goals based upon **age-appropriate transition assessments** related to training, education, employment and where appropriate, independent living skills." [34 CFR 300.320 (b) and (c)] [20 U.S.C. 1414 (d) (1) (A) (i) (VIII)] (U.S. Department of Education, 2007) Thus, appropriate transition planning for youth with disabilities encompasses a continuum of transition services which are based on appropriate transition assessment. It is also important to note that the language of the above transition services definition reflects the need for students to have more active roles in the transition planning process as it emphasizes the importance of considering a student's strengths, preferences, and interests. Consequently, the development of **self-determination skills** or youth leadership skills is critical for students in the transition years. In an effort to guide school districts and service providers in the provision of transition services, the National Alliance for Secondary Education and Transition (NASET) (2005) identified national standards and quality indicators for effective secondary education and transition practices and provided supporting evidence and research for the quality indicators. Career Cruising can assist in addressing several of these quality indicators related to assessment, schooling, career preparation activities, and youth leadership.

As noted earlier, transition assessment lays the foundation for transition planning. Sitlington, Neubert, Begun, Lombard, and Leconte define transition assessment as

"an ongoing process of collecting information on the student's strengths, needs, preferences and interests as they relate to the demands of current and future living, learning, and working environments. This process should begin in the middle school and continue until the student graduates or exits high school." (Sitlington, Neubert, & Clark, 2010, p. 74.)

Information from a student's transition assessment assists in identifying transition goals that address a student's needs. A plan for achieving these goals is then designed to encourage the development of skills the student needs in order to successfully participate in future post-school environments. Career Cruising's **ccSpringboard** program can be utilized as part of the **transition assessment** process as various components and features can be used to assess a student's career interests, skills, abilities, and preferences related to future **employment** and **schooling**. In addition, a student may access ccSpringboard's assessment tools throughout their school career so that assessment results provide ongoing feedback regarding interests, preferences, and abilities as the student matures. This assessment information could then be employed by students and transition service providers for goal setting and transition planning. ccSpringboard can also assist with a student's **transition planning** and **goal setting** as various components allow the student to explore future career and school environments and identify needed skills. Some features can be utilized to address certain transition activities or skills and others, such as the electronic Individual Learning Plan (ILP), permit a student to be an active participant in their goal setting and planning.

### How to Read the Correlation Document

The post-school activities noted in the IDEA definition of transition services and the related NASET national standards and quality indicators were referenced in creating a document that could assist transition service providers in utilizing ccSpringboard to address some of the standards, quality indicators and associated **transition activities** or **skills** important for successful participation in future **post-secondary education** and **employment** settings. Consequently, the document is organized into domains that correspond to those particular post-school activities. The exception is the area of **self-determination** which is not usually identified as a separate transition domain or post-school activity since self-determination skills are actually embedded in all transition and adult domains. Self-determination is separated in the chart solely for instructional purposes since it is critical to a student's success in future environments. **Transition-related activities** or **skills** that students with disabilities might need to successfully engage in a particular domain or future setting are identified in the first column of the document. The second column cites the supporting **NASET national standard and quality indicator** for the transition-related activity or skill listed in the first column. The third column identifies the **online feature** of ccSpringboard that can be utilized to address the transition-related activity or skill and that feature's location within the program. Career Cruising **supplementary activities and worksheets** associated with a particular ccSpringboard feature that address the same skill are noted in the last column. Finally, **additional suggestions** or **strategies** for a particular transition-related activity or skill are listed immediately after each section. Transition service providers can employ the document to identify ccSpringboard features and activities to use for assessment, exploration, skill enhancement or transition planning.

### Accommodations

Some individuals with disabilities may require **accommodations** to access ccSpringboard. Career Cruising is fully compliant with Section 508 of the Americans with Disabilities Act. As a result, it is an accessible website and is compatible with screen readers. Other accommodations could include assistance with reading or additional explanations of instructions and activities. The components of ccSpringboard are not timed, so individuals with disabilities will not be restricted by time limits.

IDEA mandates the provision of transition services to address the needs of youth with disabilities moving from school to post-school environments. The intent is to improve post-school outcomes for

youth with disabilities. In an effort to assist school districts in providing effective transition services, NASET identified national standards and quality indicators that would encourage positive student outcomes. ccSpringboard can be an effective tool in providing quality transition services to youth with disabilities as the features address a variety of transition activities and skills that are critical to the transition process and encourage positive student outcomes.

**Additional Suggestions or Strategies:**

- Ask students to carefully review the Suitable for You? feedback, Job Description, Working Conditions, Education, and Breakdown of Activities sections in the career profiles of their Matchmaker Suggested Careers.
- Engage students in discussion regarding the future educational and work requirements of a preferred career as they relate to the student's skills. Students should consider if they could perform these requirements given reasonable accommodations.
- My Skills is a helpful tool in the self-evaluation of skills. Direct students to carefully review the results for Core Skills and Desirable Skills once they have completed My Skills.
- Suggest that students focus on core tasks, working conditions, and education requirements when completing Career Selector.
- Direct students to the Related Careers section of the career profiles if they do not believe they could fulfill the requirements of a preferred career given reasonable accommodations.
- Emphasize that different careers require different levels of abilities.
- Encourage students to identify alternative careers from the Related Careers list that might be more in line with their interests and abilities.
- Recommend students compare similarities in Matchmaker and Career Selector results and carefully review careers appearing on both lists.
- Engage students in discussion related to their Learning Styles Inventory results. Ask them to identify how this information could be helpful during the training phase of a new job.

C. Design a high school education plan that meets admission requirements of selected postsecondary education setting(s). *(Continued)*

**Additional Suggestions or Strategies:**

- Emphasize that students with disabilities will have to meet the same admission requirements of postsecondary education settings as other students. Engage students in discussion regarding the differences between high school and postsecondary education settings. Stress that students with disabilities' legal rights and responsibilities will be governed by the Rehabilitation Act of 1973, Sections 504 and the Americans with Disabilities Act in postsecondary education settings and not the Individuals with Disabilities Education Act (IDEA). This would be a good time to acquaint students with the differences in these laws.

D. Design a plan to address the costs of the postsecondary education needed to attain career goal.	<b>Career Preparatory</b> ♦ <b>2.1.4</b> Youth and families understand the relationship between postsecondary education and career choices, and the role of financial and benefits planning.	<b>Explore Schools</b> <ul style="list-style-type: none"> <li>✓ Explore school profiles for estimated expenses</li> <li>✓ Use School Selector to search for schools based on tuition</li> <li>✓ Use Compare Schools tool to compare schools' estimated expenses</li> <li>✓ Use Financial Aid Selector to find scholarship opportunities</li> <li>✓ Browse through scholarship profiles using the financial aid search</li> </ul> <b>My ILP Tool</b> <ul style="list-style-type: none"> <li>✓ Complete Financial Plans in the Post-Secondary Plan section of My ILP</li> </ul>	⇒ Activity 13 – Finding the Right College  ⇒ My ILP Activity 5 – Scholarships & Financial Aid  ⇒ My ILP Activity 8 – Post-Secondary Plan

**Additional Suggestions or Strategies:**

- Discuss the impact that further education can have on a student's future earnings. It is particularly important to discuss this with students with disabilities since many do not pursue postsecondary training. This lack of further training often contributes to underemployment among individuals with disabilities. Share that the cost of postsecondary education and the effort is worth the long-term benefits. This will also help to emphasize the importance of laying a good educational foundation in high school.
- Encourage students to carefully review the criteria in the Financial Aid Selector. Prompt them to identify their challenges or disabilities in the "Personal Information" Section of the Financial Aid Selector as it may help in identifying financial aid programs for which they might be eligible.
- Suggest that students meet with the local vocational rehabilitation counselor. Rehabilitation Services can sometimes assist with the cost of postsecondary education. Certain qualifications have to be met for this and may depend on availability of funds from that agency.

**Additional Suggestions or Strategies:**

- Encourage students to evaluate results from My Skills when analyzing their skills and abilities related to career preferences. Results from these two assessments will help students better understand their abilities as they relate to careers of interest.
- My Skills results will help to identify ability areas needing further training or the need for exploration of related careers.
- Emphasize the importance of utilizing the My ILP Tool to record thoughts and reflections regarding strengths, limitations, career interests, school interests, career and life goals, and postsecondary plans. This encourages ownership of the Plan and assists in the self-awareness process.

**Additional Suggestions or Strategies:**

- Consider having group sessions or providing instruction on the steps for problem solving, decision making, and goal setting. Students with disabilities will then be better equipped to practice those components of self-determination as they develop their ILPs. The Advisement Log could be used to briefly summarize those steps or use the My ILP Homepage Files feature in SIAT to provide help documents related to these skills.
- Encourage students to print their ILPs and reference this information during IEP meetings.
- Explore the Self-determination Synthesis Project (<http://sdsp.uncc.edu>) for additional resources and information related to self-determination.
